EXPERIENCE

ANDROID DEVELOPER

- I have trained on android development for three months(9/1/2019–12/30/2019) in Adaptive TechSoft, and while then, I have built many test applications while training.
- I have made an Graduation project using android development: Stress Relief Mobile Application. SOUL :
- It's intended to relief stress and depression on basis of mindfulness, music meditation and other psychologically recommended methods.
- In addition, it will increase the users' awareness toward mental health and illnesses as these issues are still not properly handled in our culture.
- In addition to offering well studied features that would leave a positive impact on the users' life while taking their privacy into consideration.

TECHNICAN AND A+

- I have trained and worked in computer software and hardware fixing and selling computers and it's parts.

ICT PROGRAM-DATA SCIENCE

- I am currently training to be a data science expert using python programming language and using it's algoorithms to start handling data and big data and using ML and AI techniques on the data and to be good with handling big data and data anylysis and data engineering.
- I am also learning in this program about soft skills and communication skills needed in life and also in work envoriment overall to deal with customers and co workers as well, plus learning the correct way of sending emails or making reports and presentations and meetings in the best way.
- Finally, I'm also taking english classes to improve my english to help me in my life and my career, plus learning the correct way of sending emails or making reports and presentations and meetings in the best way in english language without any mistakes.
